

POWDER MEASURES

Adjustable Black Powder Measure

Basic adjustable powder measure. Part # 16361 is adjustable from 0 to 120 grains and Part # 16362 is

adjustable from 30 to 150 grains. Graduated in 10 grain increments, but can be set at any point between graduations. Constructed of brass as originals were. Measure is calibrated for FFFG black powder. Equally suitable for Pyrodex.

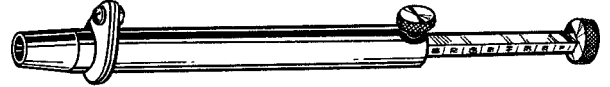

Measure most used by shooters for its simplicity, safety, economy and dependability.

ORDER#	DESCRIPTION
16361	0 to 120 grains <i>Our most popular powder measure.</i>
16362	30 to 150 grains <i>(will work with Black Canyon Powder)</i>

Adjustable Black Powder Measure

Powder Measure with cutoff spout

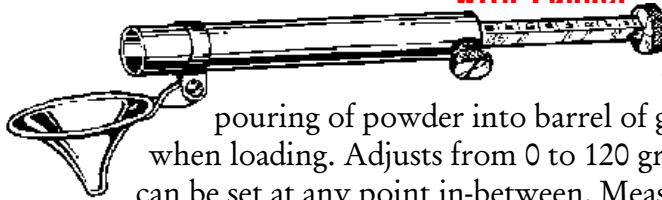

An accurate and safe measure for black powder shooting. Made of solid brass, this accessory measures exact loads from 10 to 120 grains. Non-spill spout design makes pouring convenient. **Made in USA.**

Powder Measure with cutoff spout

Adjustable Black Powder Measure with Funnel

Adjustable powder measure with pivot funnel attached. Funnel allows easy pouring of powder into barrel of gun, preventing the spilling of powder when loading. Adjusts from 0 to 120 grains, marked in 10 grain graduations but can be set at any point in-between. Measure is made of brass. For .32 caliber and larger. Like most powder measures for black powder it is calibrated for FFFG black powder or RS Pyrodex.
